## How to backup Blu-ray movies to hard drive (Mac) step by step

**Step 1: Insert a Blu-ray disc to the Blu-ray drive on your computer and launch imElfin Blu-ray Copy.**

Mac does not have a BD drive by default, so Mac users have to purchase an external BD drive to read the BD content before the backup.

**Step 2: Click "Source" to locate your Blu-ray drive.**

### Step 3: Klik "Target" to set the backup destination.

Choose to copy to an ISO file or a BD folder on your computer. And set the output folder you want to backup the BD movies to.

### Step 4: Click "Start" to start BD backup.

Due to the large storage of a BD disc, the disc-to-hard drive backup may take dozens of minutes or one to two hour. After the processing, you will find the BD

movies backed up to your hard drive successfully. To backup BD movies to iTunes on your Mac or PC, you can set the copy target as iTunes under "Music" folder.

The backed up BD ISO file or folder is primarily prepared for a disc-to-disc copy, which is an excellent choice for Blu-ray to hard drive backup, but the extracted ISO file can't be played on Mac or Windows directly. If you want to do so, imElfin [Blu-ray Ripper](#) will be a better option. This tool allows users to rip Blu-ray to MKV, MP4, AVI or any other playable format as a backup. As the name shows, imElfin Blu-ray Ripper aims at Blu-ray ripping as well as format conversion, but does not support Blu-ray disc/image/folder copy like Blu-ray copy does. Or you can consider [Total Media Converter](#), which supports Blu-ray/DVD ripping, burning, copying along with complete format conversion.
